

Air Telecom

A Redundancy solution for Heating & Cooling

Airwell

Protect
your electronic equipment efficiently
with the AirTelecom solution

Airwell

AIRWELL OFFERS YOU

a complete redundancy solution!

Our solution ensures optimal temperature, reduces failure risks, and optimizes energy efficiency.

Redundant HVAC units – guaranteed 24/7 operation

Energy-efficient and sustainable solution

Designed to protect sensitive electronic equipment and critical data

TELECOM SHELTERS

SMALL DATA CENTERS

BATTERY STORAGE CENTERS

COMMUNICATION EQUIPMENT FOR VIDEO SHOTS

MEDICAL EQUIPMENT

PHARMACEUTICAL PRODUCT STORAGE

Why is temperature control essential?

In critical environments like telecom shelters, data centers, medical facilities, and energy storage centers, temperature control is more than comfort – it's a necessity. AirTelecom is designed to:

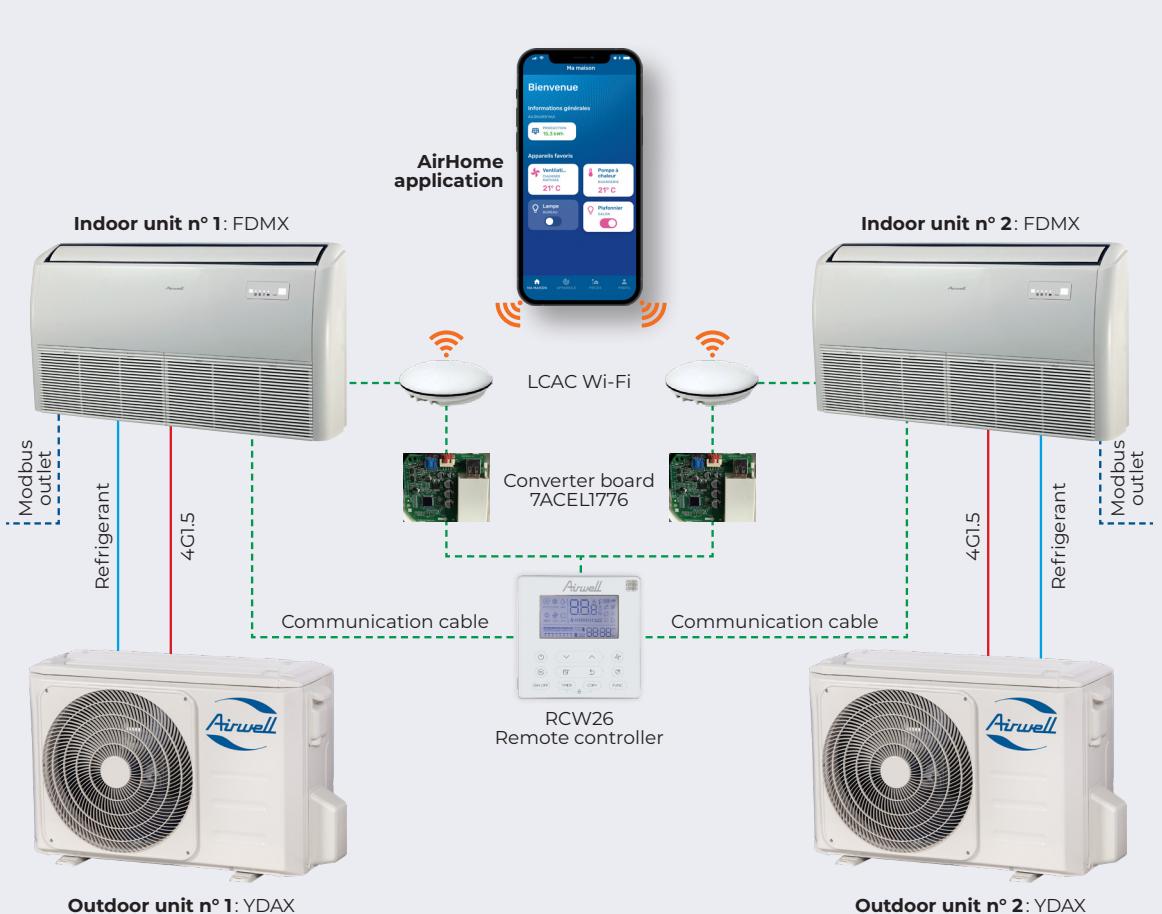

- Prevent overheating of sensitive equipment (servers, batteries, medical devices)
- Ensure 24/7 service continuity, even in extreme conditions
- Extend the lifespan of electronic equipment
- Reduce the risk of failure, data loss, or communication outages
- Optimize energy consumption through product efficiency and monitoring

A stable, well-controlled temperature ensures performance, safety, and reliability for your critical infrastructure.

Temperature and humidity requirements met:

- ✓ **Optimal temperature:** 18°C - 27°C (ASHRAE)
- ✗ **Temperature > 30°C → Risk of IT equipment failure**

Air Telecom

F U N C T I O N S

- **Automatic switchover between AC units** in case one fails.
- Simultaneous operation of both installed units under high temperature conditions.
- Automatic rotation between the two units adjustable from 1 to 24 hours.
- **Automatic restart** in case of power failure.
- Run-time management for each unit.
- **Wide operating range:** outdoor temperature from -15°C to 50°C in cooling mode and -15°C to 24°C in heating mode.

Stay in control at all times – the alarm port immediately alerts you to critical events, while the dry contact offers flexible connectivity for automation and security systems.

DRY CONTACT:

24/7 TEMPERATURE
MAINTENANCE

Ref: 7ACEL1876

User functions

To connect the remote control to FDMX, DDMD, and CDMX systems (3.5 kW and 5 kW), you must order one **7ACEL1776 interface per indoor unit.**

For XDMX in particular, you need a **1PR031990 multifunctional card.**

RCW26**DATA VISUALIZATION**

- Room temperature
- Evaporator temperature
- Condenser temperature
- Ambient temperature
- Error part numbers

AUTOMATIC RESTART

- Automatic restart and power-outage memory are built-in functions of this unit.
- After a sudden power failure, it **automatically restarts** the air conditioning units and resumes operation with **predefined settings**.

MODE SELECTION

- Automatic mode
- Dehumidifier
- Operating mode: summer
- Ventilation
- Operating mode: winter

REMOTE CONTROL

- With an **integrated infrared receiver**, the RCW26 wired controller can receive remote control signals and perform standard functions

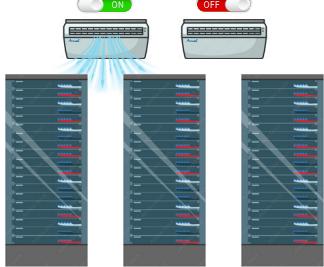

PARAMETER LOCK

- This function allows the RCW26 wired controller to be locked to prevent erroneous or malicious changes to the settings.
- **Reduces energy consumption**, especially in server rooms.
- **Cold mode lock**.

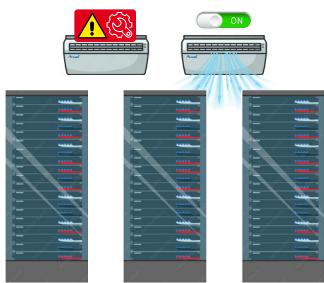

CONTROLLABILITY

- Controls the units together with the same settings or in redundancy mode via rotation function.

Three key functions TO ENSURE REDUNDANCY

1**Alternating operation**

Alternating operation between the primary system and the secondary system.

2**Backup function**

When one system fails, the other automatically starts.

3**Emergency function**

When the temperature exceeds the set threshold, both units turn on simultaneously.

SMART CONNECTIVITY**For optimal telecom infrastructure management**

- Real-time monitoring**
Instantly track your system's status: temperature, mode, and fan speed from anywhere.
- Smart and customized control**
Adjust each HVAC unit's settings individually via an intuitive mobile interface.
- Energy consumption optimization**
Monitor your units to ensure optimal system performance.
