GLOBAL SOLUTION FOR THE CONTROL AND PREVENTIVE MAINTENANCE OF VRF INSTALLATIONS

Optimal thermal comfort

Entrust your thermal comfort to AirConnectPro, in order to free you from technical constraints and operational hazards.

Visualization of your VRF fleet

View the settings of all your VRF spread across a city, region, country or around the world.

History Management

Access the complete operating history (fluidic and electrical) of each indoor and outdoor unit from the day of commissioning. Make comparisons between periods or between sites.

Preventive maintenance

Easily create your anticipation rules to prevent any problems or untimely shutdown of your systems.

Alert management

Be alerted to the slightest drift! Alerts, anomalies can be sent directly to your technicians depending on the level of technicality or their geographical proximity.

Creation of technical diagnostics

Carry out your technical diagnostics in no time and offer a technical service of unparalleled quality and speed while optimizing the work of on-site technicians.

SIMPLE DATA COLLECTION WITH THE AIRCONNECT PRO CLOUD BOX

Up to 2 VRF systems and 128 indoor units managed by one AirConnect Pro box.

AIRCONNECT PRO IS A COMPLETE SOLUTION THAT OFFERS 3 LEVELS OF SERVICE:

- **Control App** : control of indoor units
- **Service App** : diagnostic and preventive maintenance
- **Management App** : site management, energy metering and optimization

CONTROL APP (control of indoor units)	<p>Unique solution for remote control of indoor units</p> <ul style="list-style-type: none"> → Management of modes, setpoint temperatures, fan speed → “Weekly schedule” programming without rule limitation → Creation of control zones allowing energy savings
SERVICE APP (diagnosis and preventive maintenance)	<p>The ONLY preventive remote maintenance solution on the market: Prevent a breakdown before it happens!</p> <ul style="list-style-type: none"> → Remote visualization of all the parameters of the installations → VRF and diagnosis in one click → Recording of all the data allowing a complete history of history of operation → Management and follow-up of alerts to designated technicians
MANAGEMENT APP (metering and energy optimization) (in développement)	<p>The most reliable and accurate energy metering solution on the market. Thanks to the Modbus MID meter, it allows the distribution of consumption per indoor unit according to its operating parameters.</p> <ul style="list-style-type: none"> → Division of the global consumption by indoor unit or by zone → Energy audit of the installation allowing energy savings → Comparison of consumption by system or by site in order to optimize the operation of the machines and reduce energy costs
